

FAQS

How many treatments will I need?

To see maximum results a course of 8 treatments is recommended, per one body area. These treatments should be taken twice a week at regular intervals.

Which areas of the body can be treated?

The i-lipo course can be performed on calves, knees, thighs, buttocks, stomach, arms and chin. The i-lipo is a multi-pad system that makes treatment fast and efficient.

What inch loss could I achieve from this treatment?

This will vary from person to person depending on your size, but the results from the treatment will be greatly improved by your commitment to the treatment. A healthy diet needs to be adhered to and an exercise program is important to follow to enable the released fat to be used up as energy. This should be done the same day as your i-lipo treatment.

Does it hurt?

A The i-lipo is a low level laser also sometimes known as a cold laser because most people feel very little when it is used on them. i-lipo is a comfortable relaxing treatment where the typical sensation felt is just a slight warmth where the pads are in contact with your skin.

Is it suitable for men and women?

The i-lipo treatment works equally well for both.

Can everyone have the treatment?

As with most treatments in your clinic, there are a few medical conditions that would stop us from performing the treatment. Your i-lipo therapist will go through a full health and medical questionnaire with you before your first treatment to ensure you are suitable.

How long will the results last?

Booster treatments are not necessarily needed with the i-lipo, as long as your weight, diet and exercise is maintained. One treatment performed now and again is a good incentive to keep you in control.

for the body.

HOW IT WORKS

The iLipo uses a low level of visible red laser light to stimulate the body's natural processes that empty the stored fat contents inside fat cells. The laser light gently absorbs into the individual fat cells in the treatment area, temporarily opening pores in the cell wall through which the cell contents escape. This does not affect neighbouring structures such as skin, blood vessels and peripheral nerves.

The cell contents are collected by the lymphatic system and metabolised into energy during exercise. This metabolism of the contents permanently removes them from the body leaving smaller fat cells and giving you inch loss.

The Liporoom 4 step program.

After careful research and consultation with doctors, personal trainers and nutritionists, a unique and exclusive 4 step program has been designed to give you the most out of your treatment.

Step 1:

Consultation : A free initial consultation gives you an opportunity to discuss your objectives and concerns and learn more about the treatment, what is involved and what to expect and nutritional advice.

Step 2:

Body composition analysis and measurements:

This determines your current level of body fat, muscle mass and water content and sets targets to achieve that can be monitored with each treatment. Measurements are also taken with a measuring tape to monitor inch loss.

Step 3:

i-lipo and optional Ultra:

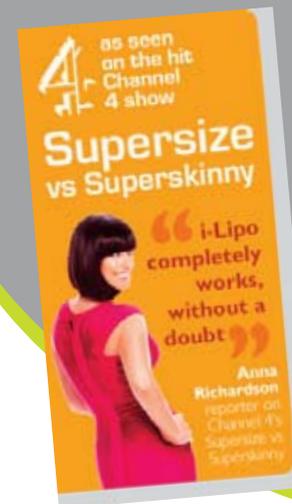

A typical i-lipo treatment will involve the positioning of up to 8 treatment pads containing the laser diodes over the intended treatment zone with elastic straps. The treatment is relaxing and pain free and a typical client can expect to reduce an area by 1-2 dress sizes during a course of 8 treatments.

The ultra simultaneously applies vacuum massage to the treatment area to improve circulation and assist in drainage of the released fatty fluid. This stimulates production of new collagen thereby improving the structure and appearance of the skin, improving the appearance of cellulite. This can be done alongside the i-lipo or in isolation.

Step 4:

30 minute workout:

A period of exercise post treatment will ensure the complete metabolism and thus elimination of the free fatty acids from the body.

"I was sceptical at first but after a course of eight treatments I have lost 9 inches over 3 measurements and have gone down a dress size."

"I had amazing results. After 6 treatments I've lost 5 inches and will definitely be carrying on. Now that I fit into more clothes this has given me the motivation to lose more weight. Thank you!"
